

Secure, Scalable AI for Government

Overview

Primer has teamed up with Palantir to bring our AI solutions into [Palantir's FedStart program](#). This partnership lets government agencies quickly access Primer's advanced AI tools within Palantir's secure, accredited environment, helping them analyze data and make decisions faster and more effectively.

About Palantir's FedStart Program and Mission Manager

Palantir's FedStart program offers a secure, compliant environment that accelerates the deployment process, facilitating quicker authorization for solutions to operate in critical missions. This allows government customers to leverage Primer's AI tools within Palantir's accredited ecosystem. Additionally, where government approval has been granted, Palantir's Mission Manager offering expands on this accredited infrastructure to also enable Primer to interact with and access data and objects in Palantir Foundry, empowering agencies to unlock the full potential of Primer's capabilities on the data that matters most.

Key Benefits

The integration of Primer's AI tools with Palantir's robust FedStart program and Foundry platform provides federal agencies with powerful capabilities to:

- **Search unstructured natural language data efficiently:** Turn vast volumes of Foundry-hosted, human-language data into actionable insights quickly. Search intuitively using everyday language or precise Boolean queries to find what matters most.
- **Unlock deeper insights:** Reveal hidden trends and patterns with dynamic, self-updating visuals like network graphs, maps, entity profiles, and timelines, helping federal agencies stay ahead of emerging developments.
- **Enhance decision-making:** Rapidly compile and share actionable intelligence for higher-confidence decision-making. Seamlessly integrate with existing tools and systems for a smooth workflow.
- **Leverage accredited systems:** Streamline approvals with Palantir FedStart, enabling fast deployment of Primer's AI tools while meeting compliance standards.
- **Reliable enterprise security:** Operate securely with Primer's AI tools integrated into Palantir's trusted, accredited environment, ensuring data protection and reliability.
