

REAL-TIME TACTICAL INSIGHTS ON THE FALL OF AFGHANISTAN

The Situation: It's August 2021 and the Taliban have taken control of Kabul, Afghanistan. US forces work to evacuate thousands of citizens and pull the last American troops out of the country. It's your responsibility to quickly gain situational awareness on the ground and assess the impact of events as they are unfolding. You leverage **Primer Command**, the first-of-its-kind AI technology created by and for security analysts, to cut through the noise and quickly surface key insights to identify the "who, what, when, where, and why" of this breaking event in the first 10 minutes of your day.

TIMELINE

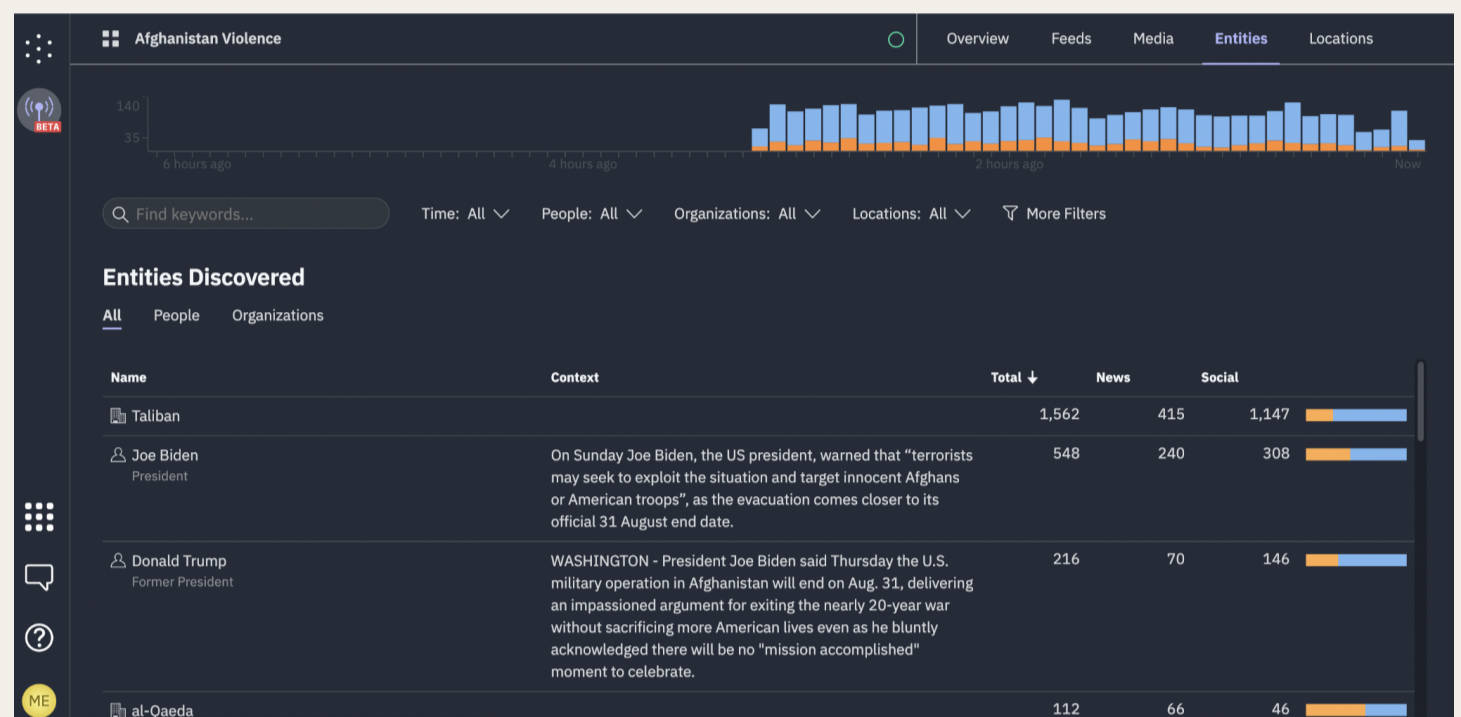

0700

Run your custom query on **Afghanistan** and monitor the situation in real-time with a comprehensive overview dashboard.

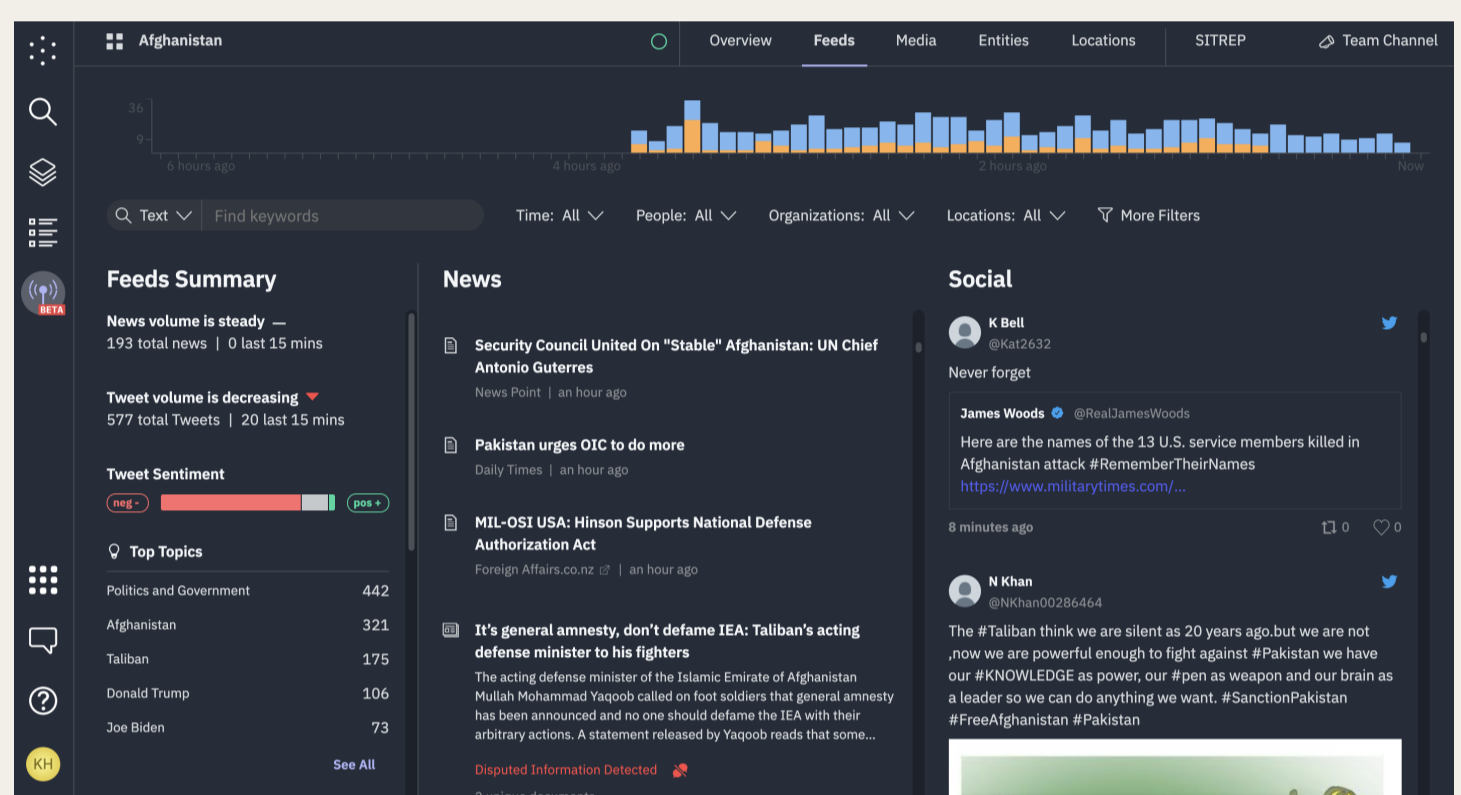

0702

Who: Surface and understand the key **People** and **Organizations** relevant to the situation and the context around their involvement.
